Debit Card Safety and Blocking - Training Sample

TRAINING SAMPLE - fictional information, not bank policy

Important notice

This is a fictional training example. Use your own bank official app, website, or phone number printed on your card for real support.

If a card is lost

Use the bank official mobile application or internet banking to temporarily lock or permanently block the card, if those options are available. Alternatively, contact the bank using a verified official support channel.

Protect your information

Never share your PIN, one-time password, full card security code, or banking password with a caller or message sender. A legitimate support representative should not ask you to disclose your PIN or one-time password.

After blocking

Review recent transactions through the official bank channel and promptly report transactions you do not recognize. Ask the bank how to request a replacement card.
